

Like the previous one just used illegal characters using pregmatch

Use

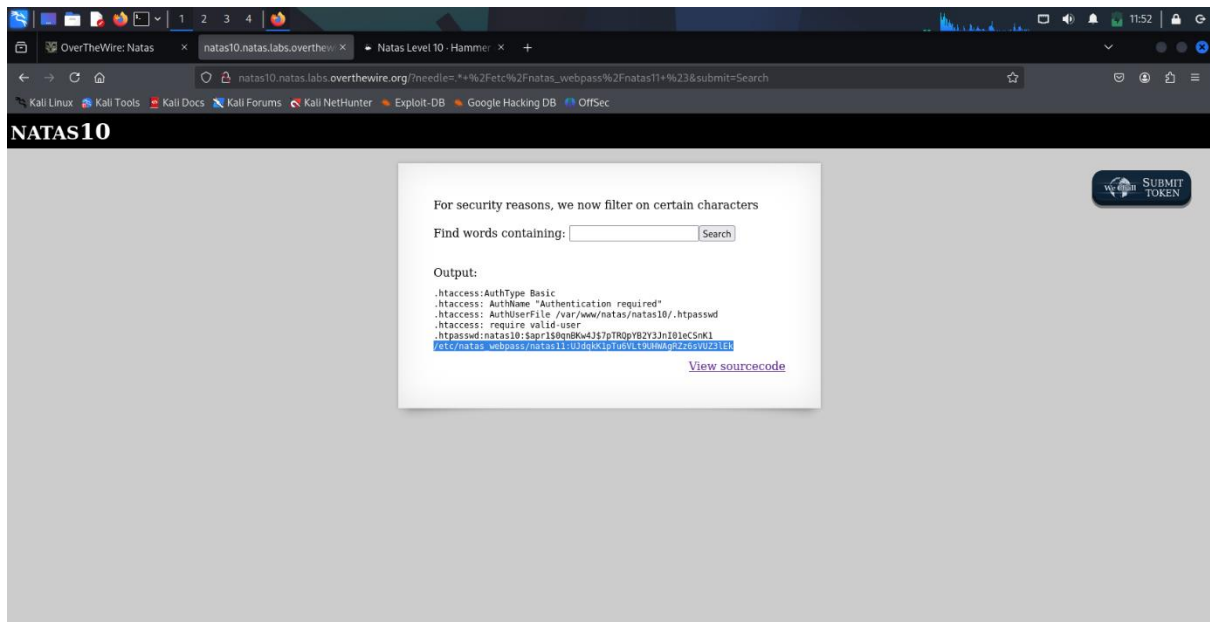

`.* /etc/natas_webpass/natas11 #`

For output

`/etc/natas_webpass/natas11:UJdqkK1pTu6VLt9UHWAgRZz6sVUZ3IEk`

`.*` tells grep to match anything,

followed by the literal path `/etc/natas_webpass/natas11`

UJdqkK1pTu6VLt9UHWAgRZz6sVUZ3IEk
